

Building intelligent businesses through technology.

Enterprise software, AI-powered automation and e-invoicing readiness for organisations in the UAE and beyond. Home of Mithaq ERP, our integrated platform for property, finance and operations.

Your technology partner for an intelligent business future.

Since 2005, Mithaq Technologies has built enterprise software for real estate and other organisations in the UAE and beyond. Home of Mithaq ERP, with AI-powered automation and e-invoicing-ready integrations. Headquartered in Sharjah, with development centres in Mumbai and Hyderabad. We build and support our own enterprise platforms and deliver customised applications, mobile apps, integrations and AI solutions. Mithaq means covenant: a binding commitment, which is how we approach every client relationship.

Products

Mithaq ERP

One integrated platform for property, leasing, finance, facilities, procurement and people — with workflows, portals and reporting built in.

AI Solutions & Agent Platforms

AI agents, intelligent document processing and AI-assisted reporting that work inside your business systems, with the controls enterprises need.

Customised Enterprise Applications

Purpose-built business applications for specialised workflows that off-the-shelf software cannot handle well.

Mobile Business Applications

Mobile apps for tenants, customers, employees, technicians and management, connected to live enterprise data.

Mithaq ERP modules

- **Leasing & Property Operations** (core)
- **Accounting & Financial Management** (core)
- **Workflow & Approvals** (core)
- **Reminders & Notifications** (core)
- **Reports, Dashboards & Forecasting** (core)
- Facility Management & Maintenance (optional)
- Cleaning Services Management (optional)
- Legal Case Management (optional)
- CRM & Sales (optional)
- Procurement & Inventory (optional)
- HR & Payroll (optional)
- Document Management (optional)
- Tenant Mobile App (optional)
- Integrations (optional)

AI-ready

AI agents, intelligent document processing and AI-assisted reporting, connected to live business systems with human approval and audit trails.

E-invoice-ready

Readiness assessment, ERP and accounting integration with e-invoicing service providers, and automated digital invoice processing. Readiness describes implementation capability, not certification

Services

Six practice areas, one accountable partner.

Enterprise Software Solutions

ERP implementation, enterprise applications, process automation and modernisation of legacy systems.

Artificial Intelligence & Automation

AI strategy, agent development, workflow automation, private AI deployments and intelligent analytics.

Digital Transformation

Process digitalisation, workflow and document management, system integration and application modernisation.

Software Development

Custom web and mobile applications, APIs and integrations, database design and enterprise architecture.

Cloud & Infrastructure

Hosting and deployment, infrastructure architecture, database management, performance and ongoing support.

E-invoicing & Digital Compliance

Readiness assessments, e-invoice integration, ERP and accounting connections and digital invoice processing.
